## Set the Current Time and Day

1. Press and release the **reset** button. The display will flash.
2. Press and hold 🕐 and **+h** simultaneously. The display will show 12:00AM. Then, if your time zone is currently:
   - in Daylight Savings Time: Press the **+1h** button. Got to step 3.
   - not in Daylight Savings Time: Go to step 3.
3. Press and hold 🕐. Press **h+** until the display shows the hour.
4. Press and hold 🕐. Press **m+** until the display shows the minute.
5. Press and hold 🕐. Press **Day** until the display shows the day.

## Program Auto Defrost Cycles

Up to 7 cycles can be set. Each must have an On (start) and an Off (stop).

1. Press the **Timer** button. The display will show:

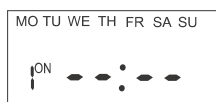

### Program a Defrost On

1. Select the day(s). Press **Day** to select the day(s) of the week.

| Day(s) | Select |
|---|---|
| A specific day | The desired day |
| Every weekday | MO, TU, WE, TH, FR |
| Every weekend | SA, SU |
| Monday through Saturday | MO through SA |
| Monday, Wednesday, Friday | MO, WE, FR |

2. Select the hour. Press **+h** to scroll to the desired hour.
3. Select the minute. Press **+m** to scroll to the desired minute. The display will show:

4. Press **Timer** to save the settings and go to set the Defrost Off.

### Program a Defrost Off

1. Repeat steps 1-3 to set the day(s), hour and minute. The display will show:

2. To program another defrost cycle, press **Timer.** Follow the steps for programming a defrost start time.
3. To end programming, press 🕐 to return to the main screen.

## Change Defrost Cycle Settings

1. Press **Timer** to scroll to the On or Off entry you want to change.
2. Then,

| To Change the Start or End | Repeatedly Press and Release |
|---|---|
| Day(s) of the week | **Day** |
| Hour | **h+** |
| Minute | **m+** |

3. When finished, press 🕐 to confirm the settings.

## Override the Settings

### To Manually Defrost the Machine

Press **OVR**. The machine will remain in defrost mode until either the defrost mode is manually stopped or the start of the next programmed cycle. The display will show:

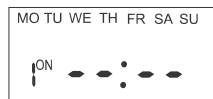

### To Manually Stop a Defrost

Press **OVR**. The display will show:

## Delete Defrost Settings

1. Press **Timer** to scroll to the On or Off entry.
2. Press **OVR** to delete the entry. The display will show:

**Note: Each cycle must have an On and an Off**. **Be sure to delete both the On and Off entries.**

3. Press 🕐 to return to the time of day screen.

## Reset the Timer

Resetting the timer will delete all of the programmed defrost cycle settings.

1. Press **Reset.**
