Vollrath's self-contained Refrigerated Display Cases keep chilled food refrigerated while it is displayed for sale. Drop-in cases have sliding operator-side doors for easy access for selling, refilling, changing displays and end-of-day cleaning. Countertop cases are available with customer and operator-side access or operator-side-only access. Display cases are not intended for overnight storage of perishable food.

**CLEARANCE AND VENTILATION REQUIREMENTS**
- Drop-in cases require a minimum of 4" (10.2 cm) of non-combustible countertop to support the unit and a minimum of 6" (15.2 cm) clearance on all sides of the drop-in for proper air circulation.
- Countertop cases require a minimum of 4" (10.2 cm) between the equipment and any surrounding walls. Surrounding walls must be made of non-combustible materials.
- Drop-in case requires a minimum of 80 square inches for fresh air intake and a minimum of 80 square inches for exhaust. See back page for details.

**FEATURES**
- Inside lighting strips located both at the top of the case and underneath the upper shelf create optimum food display throughout cabinet
- Self-contained refrigeration system
- Dual fans circulate air throughout the case to ensure even temperature control
- Case defrost mode
- Countertop cases with only operator-side access have a glass heater feature. Not available on drop-in cases or cases with customer-side (self serve) access.
- Double-glazed front glass gives added strength and insulation
- Drop-in and curved cases have two shelves. The cubed case has 3 shelves
- Lift-and-remove rear sliding doors for easy display changes and end of day cleaning
- Drop-in cases can also be used as freestanding countertop units
- 32° - 68°F (0° - 20°C) temperature range
- 6 ft. (1.8 m) cord
- Note: these items must ship by truck

**WARRANTY**
All models shown come with Vollrath's standard warranty against defects in materials and workmanship. Three years on the compressor. For full warranty details, please refer to www.Vollrath.com.

### Drop-in Venting Requirements

Customer supplied louvers must be installed in surrounding cabinet to ensure adequate ventilation. One intake and one discharge louver are required. Preferred louver location is the short ends of the cabinet.

### Receptacle
